

WE'VE MADE LAKE SPRING PARK BETTER FOR YOU

When Lake Spring's ducks are eating the wrong thing, our park becomes overrun with animal feces. This is not healthy for our visitors, especially young children. It's definitely not healthy for the ducks to eat food like French Fries, bread, popcorn or corn feed.

We are feeding the ducks wildlife-friendly food on a daily basis. You can also do your part to make Lake Spring healthier. If you would like to feed the ducks some snacks, please use food dispensing machines that will be available starting May 1. Individual packets of the same duck food are available for purchase at the store across the street.

Lake Spring Park just underwent an extensive renovation. Besides adding 900 feet of new decorative fence to the park, the new landing area for the water fowl has been established in the back of the park complete with new feeders and shelters. In addition, a brand new pump system designed to enhance the flow of fresh water from one pond to the other is in place. Visitors will also notice new walkways and curbing all designed to return Lake Spring to its former status.
